

BHAVPREET SINGH ARNEJA

902-318-2611 | Nova Scotia, Canada | x2022fcb@stfx.ca | linkedin.com/in/BhavpreetSinghArneja

PROFESSIONAL SUMMARY

Curious and innovative Computer Science student with a proven track record of delivering value in large corporate environments, including three successful terms at Sobeys. Passionate about leveraging emerging technologies, cloud infrastructure, and automation to reshape the digital customer experience.

EDUCATION

Bachelor of Science with Advanced Major in Computer Science (Co-op) Jan 2023 - Dec 2026
St. Francis Xavier University, Antigonish, NS

- **Awards:** Dean's List (2023, 2024), StFX National Entrance Scholarship 2022
- **Relevant Coursework:** Database Management System, Deep Learning, Artificial Intelligence, Computer Organization, Advanced Data Structures & Algorithms, Natural Language Processing

TECHNICAL SKILLS & CERTIFICATIONS

Cloud & DevOps: Microsoft Azure, Azure DevOps, CI/CD, Git, Github, Docker

Data & Analytics: Python, SQL, R, Google BigQuery, data pipelines, prompt engineering, Generative AI

Programming Languages: Python, SQL, Java, Kotlin, PowerShell, JavaScript

Core Competencies: Agile Methodologies, Technical Documentation, Microsoft Office Suite (Excel, Word, PowerPoint), Problem Solving, Stakeholder Collaboration

CERTIFICATIONS

Microsoft Azure Fundamentals 2024

- Gained expertise in Azure VMs, App Services, and secure cloud infrastructure management

Fortinet Cybersecurity Fundamentals 2024

- Comprehensive knowledge of network security fundamentals and FortiGate firewalls

Online certification course- The Complete 2022 Web Development Bootcamp 2022

- Developed proficiency in Node, React, MongoDB, Web3, through a 65 hour virtual program

Online certification course- 2022 Complete Python Bootcamp from Zero to Hero Python 2022

- Achieved proficiency in Python for Data Science & Analytics

PROFESSIONAL EXPERIENCE

Cloud Administrator Intern, Sobeys, Stellarton, NS, Canada May 2026 - August 2026

- Spearheaded Azure cloud governance and infrastructure hygiene across Development, QA, and Production landing zones, decommissioning orphaned storage accounts, legacy disks, and retired VM SKUs to reduce attack surface, eliminate cost waste, and strengthen the overall security posture
- Led security and compliance remediation at enterprise scale, retiring deprecated TLS 1.0/1.1 protocols across Log Analytics workspaces and sunseting legacy SFTP connectors — driving resource-owner alignment across multiple teams to close vulnerabilities and meet compliance baselines
- Executed identity and access management (IAM) and Zero Trust initiatives, provisioning Active Directory groups and migrating from Azure Entra ID groups to enforce least-privilege access and enable secure cross-functional collaboration
- Owned the end-to-end change management lifecycle in ServiceNow (RFCs, CAB submissions), and built audit-ready governance artifacts including a multi-subscription SHIR inventory register and infrastructure trackers spanning 1,800+ VMs across 10 subscriptions

IT Ops Transformation student, Sobeys, Stellarton, NS, Canada Sept 2025 - Dec 2025

- Managed and resolved end-to-end service tickets for enterprise store systems (e-Plum), ensuring rapid response times to support uninterrupted retail operations
- Collaborated closely with cross-functional internal store teams and external vendors, building relationships to facilitate effective incident investigation and troubleshooting

Cloud COE Summer student, Sobeys, Stellarton, NS, Canada

May 2025 - Aug 2025

- Supported the Cloud Center of Excellence (CCoE) in managing and scaling Azure infrastructure across Development, QA, and Production environments
- Embraced emerging technologies by automating the cleanup of unused and misconfigured cloud resources using PowerShell scripts, significantly reducing security risks and optimizing IT costs

PROJECTS

AI Fraud Detection & Transaction Monitoring Engine — AI Fraud Detection & Transaction Monitoring Engine — Python, XGBoost, FastAPI, Docker, Azure Container Apps

- Built an end-to-end fraud detection system trained on 284K+ credit card transactions (0.173% fraud rate), engineering a hybrid pipeline that combines an XGBoost classifier with a rules-based velocity engine to catch fraud patterns ML alone misses
- Reduced false positives from 1,542 to 12 by selecting XGBoost over logistic regression and tuning the classification threshold via precision-recall curve analysis (PR-AUC 0.879)
- Containerized the system with Docker and deployed a FastAPI backend plus Streamlit dashboard to Azure Container Apps, backed by a fully passing pytest suite

Word Sense Disambiguation Engine (GlossBERT) — Python, PyTorch/Transformers, FastAPI, Docker, Azure Container Apps

- Designed and implemented a GlossBERT-based Word Sense Disambiguation model across a multi-milestone NLP course project, consolidating the codebase into a public GitHub repository
- Wrapped the trained model in a FastAPI inference endpoint with an interactive Streamlit demo, enabling real-time sense prediction for ambiguous words in context
- Containerized with Docker and deployed to Azure Container Apps with scale-to-zero configuration, reusing the same CI/CD deployment pipeline built for the fraud detection engine

Spotify Music Recommendation System & Track Popularity Predictor (Python, ML, APIs)

- Built a Python-based recommendation system using the Spotify API and machine learning to predict track popularity
- Performed extensive data cleaning, exploratory analysis, and feature engineering; communicated technical insights using Matplotlib visualizations for stakeholder-ready reporting.

PROFESSIONAL DEVELOPMENT

St. Francis Xavier University, Antigonish, Nova Scotia

- Science Atlantic's 2024 Mathematics, Statistics, and Computer Science Conference
- Participated in the Science Atlantic 2023, 2024 Conference, and demonstrated programming and problem-solving skills
- Collaborated with other post-secondary students from different universities across Atlantic Canada

Université de Moncton, New Brunswick, Nova Scotia

- International Collegiate Programming Contest (ICPC) for the Northeastern North American region
- Represented StFX in this international competition, and secured a team rank of 63 out of 93 teams, demonstrating innovative problem-solving with teamwork under time constraints.

COMMUNITY ENGAGEMENT

X Helping Hands — Co-Founder & Project Lead NS, Canada, Facilitator September 2024 – Present

- Co-founded and led a community-focused initiative funded by the McKenna Leadership Project Grant (2024), supporting international and domestic students through lived-experience storytelling and practical resources

Connecting Math to Our Lives and Communities (CMTOLC), Antigonish Facilitator February 2023 – Present

- Designed and led STEM-focused learning sessions for Mi'kmaw and African Nova Scotian students (ages 4-14)
